

STAR
COOLING TOWERS

Maintenance Platform

Durable, lightweight & strong fiberglass

Star Cooling Towers offers fiberglass equipment access walkways and work platforms for permanent or temporary use. They are corrosion-resistant, slip-resistant, ultraviolet-resistant, strong, lightweight, and fire-retardant.

The strong, light fiberglass panels or grating can be custom-designed for the best fit around mechanical equipment for maintenance and service.

Fiberglass is light enough to handle without the heavy equipment steel grating requires. Also, no need for scaffolding and planking, saving field labor and downtime.

Corrosion resistance and a gridded surface provide a durable, slip-resistant, safe, walkway for distribution basins and plenum walkways. Available in solid or gridded designs.

Molded-in color means you skip costly recurring maintenance such as painting or coating.

Contact Star Cooling Towers for custom-designed and installed fiberglass platforms or walkways, and handrails, in accordance with OSHA design specifications, for your cooling tower regardless of age or manufacturer.
