

Precision-Flo™

Crossflow Nozzles

Star Cooling Towers Precision-Flo water distribution nozzle is a non-clogging nozzle designed specifically for all crossflow cooling tower applications. It provides excellent flow characteristics utilizing a one piece design with single support distribution plate. This produces a uniform distribution pattern helping to enhance the cooling tower's thermal performance.

A unique color coding system allows for easy identification of the correct orifice size. Available orifice sizes range from .625" to 1.375".

The Star Precision-Flo crossflow nozzle is easily installed and can be easily removed for cleaning or replacement.

The nozzle is manufactured of inert high strength injection molded polypropylene for outstanding corrosion resistance and strength.

Star Cooling Towers Precision-Flo™ Non-Clogging Nozzle

OEM Replacement Parts

Star Cooling Towers is a complete cooling tower supply company, offering a wide range of products to the cooling tower industry since 1951. Our large selection of quality OEM (Original Equipment Manufacturer) replacement parts are compatible with most models and manufacturers of cooling towers and they offer a high quality, reliable, low-cost alternative to expensive original equipment parts.
