

Cooling Tower Fan Brakes

FAN BRAKES

What Makes REXNORD® ADDAX® Cooling Tower Fan Brakes the Ideal Choice?

- Ensures the safety of both plant personnel and equipment by effectively isolating the fan.
- Features a cross-pin locking mechanism for fan lockout.
- Utilizes critical components crafted from 316 stainless steel, ensuring exceptional corrosion resistance.
- Remote actuation located outside the fan stack to maximize safety.
- Boasts a straightforward, low-maintenance design.
- Offers universal mounting options, with brake placement available at 3, 6, and 9 o'clock positions.
- Incorporates naval brass fittings to eliminate the risk of galvanic corrosion.
